Your Boys

I have four sons, two of them approaching the age when they must go out and face the earning of a living, writes a man to a newspaper. Is he disturbed and troubled over the prospect of the difficulties which for the time being may confront these young men in obtaining employment and making a start in life? No, he is wise enough and has had experience enough to realize that countless thousands of other young men starting to carve out careers for themselves had to face difficulties and had many obstacles to overcome. No doubt he passed through such experiences himself. It has been the way of the world since time immemorial.

Nevertheless this father of four boys is worried. He has reason to be, and so, too, have other parents all over the land. The man writes that all this recent propaganda, these ever repeated demands, that the Government should guarantee "the security of the home, the security of livelihood and the security of social insurance" causes him to wonder if the prospect of so much sheltering, so much safeguarding, so much financial protection, so much paternalism will cause his boys to discount, disregard, despise his teachings.

I have, he says, tried to impress upon them that they must fit themselves to make their own way in the world, that they must develop self-reliance, that they must cultivate a spirit of many independence, that they must be prepared to earn every penny coming to them, that they must expect nothing for nothing in this world.

To achieve this, I have emphasized that they must be studious and industrious, that they must exercise rational frugality and self-denial until they have accumulated a competency, that they must aspire not only to take care of themselves and their dependents, but to acquire means to aid generously those who are in need.

I have warned them against extravagance, ostentation, thriftlessness, thoughtlessness, in order that they may escape the hardships and humiliations which befall so many in old age, explaining that it is infinitely better to be able to bestow charity than to be compelled to accept it.

"Don't let any professor convince you," I tell them, "that the world owes you a living. Get it firmly into your head that it is up to you to fit yourself to earn a living and that you will encounter plenty of competition. Don't hesitate to sacrifice in the fore part of your life if you hope to fare well in the later part of your life. Rainy days will come. Make diligent provision for them."

I tell them that, going forth in this spirit, eager to put more into the world than they hope to take out of it, and possessing unshakable faith in the eternal laws of justice and righteousness, they will find life joyous, they will accept difficulties as a challenge to their manhood, that, doing the right, they will never be tempted to give way to despair, but will find their own life increasing in happiness and service with the passing years.

Above all, that they must not be drones, loafers, leeches; that they must exert themselves to the utmost to be useful; that through self-discipline and self-denial they may reasonably hope to earn the means to practice generosity and unselfishness.

Now, however, there is dangled before them the prospect of an earthly Utopia, ruled by a Santa Claus Government, pictured as prepared to shoulder responsibilities which I was taught could be and must be discharged only by each individual for himself, responsibilities which were portrayed not only as inescapable, but as essential to the development of sturdy manhood, development of the soul, development of sterling character.

I am somewhat troubled lest my own young men and other young men may imbibed the notion that hereafter there is to be less need for supreme effort, less need for self-denial and self-discipline, less need for sacrificing to save, less necessity for self-reliance, less occasion to worry over finding work to do in the world or to sweat to perform it unstintingly, less reason for systematically striving to provide for old age.

Perhaps this man is unduly concerned about the effect which all the loose talk of to-day about taking no thought of the future—that the Government will look after everybody at all times and under all possible sets of circumstances—is having on the youth of the country. Possibly his anxieties and questionings will prove wholly unwarranted. Let it be hoped so for his sake, and the sake of his four boys and of all other young men who may be tempted to disregard the teachings, the lessons and experiences of past generations and of growing self-reliance and self-effort to the winds, become leeches on the state.

Nevertheless, all thoughtful and conscientious fathers and mothers must be perturbed as they witness the outpourings of dreamers and faddists preaching false doctrines and seeking to wean the young people of to-day away from acceptance of and belief in those cardinal qualities which constituted the characters of men and women who have left their impress on the life and progress of the world, and lived useful lives. The worst enemies of youth are those self-appointed advocates and saviours who present to them as ideal a life of absolute contentment and leisure, free of personal responsibilities, free of worry, free of difficulties, with Governments playing the role of Santa Claus every week and month of the year.

Improve Montreal Harbor

May Move Passenger Section Five Miles Eastward

Plans for the complete rebuilding of Montreal harbor were outlined at a meeting of the Montreal harbor commissioners. The plans would allow quicker access from the St. Lawrence river, higher water, easier dredging in the softer bottom and elimination of the "St. Mary's current."

It was learned the harbor plans will in time move the whole passenger harbor about five miles eastward. The drawings show eight new piers, four of which will be long piers likely to accommodate two ships, while in between them are four shorter piers. It is expected the new piers will accommodate about 40 vessels.

Decision to move the harbor further east, it was learned, came after a statement by chief harbor engineer Paul Leclair that dredging is a much easier task in the softer bottom further down the river.

Moving of the passenger section eastward, with softer bottom allowing easier dredging which would deepen the water, is expected to bring larger ocean-going ships to Montreal. In time it is hoped to have the channel deepened to 40 feet. The St. Mary's Current, which makes shipping at times hazardous, is practically negligible further down the river, it was stated.

The new harbor development would cut down the time in the run from Quebec to Montreal by about an hour.

SHE PLAYS ORGAN AT 75 YEARS

Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:

"My hands 'were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August, I played two church services on the organ, and hope to do again this August. My fingers are nearly straight, and quite supple, and I am 75. I have recommended Kruschen Salts to many people."

A.A.C. The six mineral salts of Kruschen have a direct effect upon the blood, and in so doing, use and restore the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

Currency Stabilization

Want Anglo-U.S. Conference To Settle The Question

Stabilization of world currencies was introduced into the budget debates in the British House of Commons by Sir Herbert Samuel, leader of the Liberal opposition, and other speakers.

"I wish the chancellor in his report had expressed a desire to secure a measure of stabilization of currency and could have told us some form of a conference is contemplated with the United States upon which, fully as much as upon ourselves and France, the decision rests," said Sir Herbert.

"Japan depreciates the yen, America the dollar, Belgium the belga, Britain the pound," Sir Herbert continued. "Depreciation is one of the prime reasons for the low level at which the state of the world continues."

"I regret the chancellor has made no survey of this important factor," Furness Braitwaite, Conservative, echoed Sir Herbert's sentiments.

The milkman is becoming quite diversified in his line of products. Not only does he deliver orange juice, eggs, cheese and milk to New York residents, but in Providence he has added oysters to his morning deliveries.

The first book of American cooking recipes has been attributed to Eliza Leslie, Bostonian, the date being 1830.

Strange Substance

Produce Hormone That Has Effect Of Taming Wild Animals

Isaiah's prophecy that the lion and the lamb shall lie down together and a little child lead them was shown to be a scientific possibility at the American Philosophical Society meeting in Philadelphia.

The chemical substance to tame both animals is available if anyone wants to try it out.

The society was shown motion pictures of a fierce, flesh-eating, grown rat lying down with a new-born squab and trying to mother it. The pictures were shown by Dr. Oscar Riddle, of the Carnegie Institution of Washington.

The rat had received an injection of prolactin, a hormone produced by the pituitary glands of human and all mammals, including lions. The rat was an unmated female, with nothing but wild instincts, and no previous experience with mothering anything.

The prolactin induced immediately a maternal instinct so powerful as to make the rat's natural appetite for eating young squabs.

Prolactin was discovered three years ago by Dr. Riddle. Previous experiments with it indicate that it acts on all animals in similar fashion.

Its primary function is to cause female mammals to give milk for their young. It has done that even when given to males.

Gets Coveted Medal

The U.S. war department has presented the coveted "Purple Heart" medal of honor to Johnny John, full blood Cree Indian and world-war veteran of Wetumka, Oklahoma. He was cited for bravery and severe wounds sustained in the Meuse-Argonne battle of 1918.

Milk baths are offered guests at hotels on the island of Oshima, near Japan, because milk is plentiful and water is scarce.

Little Journeys In Science

SOAP

(By Gordon H. Guest, M.A.)

When fat or oil and alkali are heated together under proper conditions soap and glycerin are produced. Soap is made commercially on a very large scale. The oil or melted fat is poured into huge kettles together with a solution of lye. As a rule the kettles are very large, 500-600 pounds or more of soap being made in some of them in a single heating. They are provided with coils of steam-pipe for heating the liquid. The fat and alkali are stirred by forcing live steam into the bottom of the mixture. The chemical reaction which takes place in soap-making is completed in about one day. The soap is then suspended as very fine particles in the liquids present, or the chemist would say that the soap is in the form of a colloidal dispersion. To obtain the soap in the solid form common salt is added and this process is known as "salting out." After the salt is added and the mixture heated, the soap rises to the top of the liquid and the soap thus obtained is purified by washing and settling processes and is then run into the mixing machine called the crutcher. Here it is mixed with substances such as perfume, borax, waterglass, or washing soda. It is then run into large molds called frames to harden, after which it is cut and pressed into cakes of the desired size.

Transparent soaps are usually made by dissolving dry soap in alcohol and adding from 15 to 25% of sugar. Castile soaps are made of olive oil. The colour of mottled soaps is produced by the addition of Prussian blue or some similar pigment. Floating soaps owe their lightness to bubbles of air and naphtha soaps contain about 5% of petroleum naphtha. Scouring soaps contain from 8 to 10% of soap and from 80 to 90% of some material such as fine sand or volcanic ash. Soap powders usually consist of a mixture of washing soda and ground soap to the extent of 10 to 25%.

The Big Bend area of Texas is a triangle of about 5,000 square miles enclosed by the big bend of the Rio Grande river.

Amending British North America Act May Result In An Entirely New Constitution For Canada

The matter of amending the British North America Act is one for discussion between the Dominion and the provinces, according to various provincial attorneys-general, telegrams from whom were read to the parliamentary committee considering the B.N.A. Act.

The provincial administrators believed the Dominion should formulate its plan first and then submit it to the provincial authorities, after which a conference would ensue.

"The question of what, if any, provision is to be made for amendment of the Canadian constitution from time to time," said Hon. T. C. Davis, attorney-general for Saskatchewan, "is one which ultimately must be decided by conferences between the governments of the provinces and the government of Canada with the possibility of a previous preliminary inter-provincial conference. In view of this fact it would appear to be unwise for the provinces to be giving their views before a committee of the House of Commons."

Mr. Davis suggests the committee make its report to the house and that this report be made available to the provinces.

Hon. W. J. Major, for Manitoba, declared he would submit recommendations after prorogation of the provincial legislature.

New Brunswick declared that a brief would be submitted to the committee after adjournment.

Amendment to the B.N.A. Act should take the form of an entirely new constitution for Canada, and it should be drafted by a constituent assembly representative of the whole people, Dr. Arthur Beauchamp, clerk of the House of Commons, told the committee studying the proposals to amend the act. The imperial parliament should, after Canada's new constitution was written, be requested to repeal the act.

Enlarging upon the suggestion, Dr. Beauchamp declared the personnel of this constituent assembly should be representative of the senate, the house of commons and the provincial legislatures and should be one-fourth of the present number of each.

That was to say, the senate, with 96 members normally, would have 24 representatives in the constituent assembly. The House of Commons would, with its 245 members, have 61. The provinces would be proportionately represented as follows:

Alberta, 16; British Columbia, 12; Manitoba, 14; New Brunswick, 12; Nova Scotia, 8; Ontario, 23; Prince Edward Island, 8; Quebec, 24; and Saskatchewan, 18. The total representation would be 223.

This constituent assembly would meet at Winnipeg, summoned by proclamation issued by all the legislative bodies involved. It would be clearly set forth that "minority rights," preserved under the present British North America Act, would not be discussed. The representation would be drawn from all classes.

"There ought to be no government side nor any official opposition in such a body," said Dr. Beauchamp. The assembly would work on the lines of coalition. A committee of premiers and leaders of the opposition in the House of Commons and legislatures would have charge of the agenda and daily order of business.

At the first meeting each province would present its case and committees would deal with every chapter of the British North America Act. Such matters as reducing membership in the House of Commons, election of senators, fisheries, Companies act, insurance laws, radio and other questions would be thoroughly threshed out.

One item to be decided would be whether Canada would alter its name from a Dominion to a kingdom.

Once a constitution had been adopted by the assembly, Dr. Beauchamp continued, it would be approved by each province and by the Dominion, then it should receive the assent of the king. Such a procedure would apply to subsequent amendments which would require a ma-

jority of two-thirds of the respective legislatures.

Dr. Beauchamp was opposed to continuing provincial subsidies. There should be a readjustment of taxation and expensive services should be transferred to the Dominion. Each province should pay the salary of its own lieutenant-governor, who would, however, continue to be appointed by the Dominion. Similarly, the provinces would be required to pay the judges of their own superior courts.

Dr. Beauchamp urged establishment of a Canadian judicial committee of the privy council.

Choosing Fertilizers

Provincial Governments Assisting In Work For Benefit Of Farmers

This is the time of year when farmers are purchasing or considering the purchasing of fertilizers for the various farm crops.

Until quite recently, farmers who had not made a study of fertilizers usually depended upon the local fertilizer agent to advise them as to the particular analysis they should use, and unfortunately the advice from this source was not always in the farmer's best interest. A more acceptable source of information is now at the service of farmers, for the Provincial Governments in Eastern Canada have in recent years set up fertilizer councils composed of leading authorities in agricultural chemistry, farmers who have a practical knowledge of the use of fertilizers, and representatives of fertilizer manufacturers. These councils publish recommendations as to the analyses most suitable for the various crops under the various soil conditions, and thus are performing a valuable service to farmers in assisting them to select fertilizers which promise the most economic returns.

The fertilizer division of the Seed Branch, Dominion Department of Agriculture, commends the work of the Provincial Fertilizer Councils for the guidance afforded by them to farmers in solving fertilizer problems.

Reduction In Insurance Rates

25 Per Cent. Reduction For Freight Traffic Over Bus Route And Season Extended

A 25 per cent. reduction in the cargo insurance rates on freight traffic over the Hudson Bay route has been granted by Lloyd's.

Coupled with this is an extension of a month and five days in the open season for which insurance may be obtained.

Last year's rates will apply for the extension period. Announcement of the new rate was made at Regina by Hon. W. J. Patterson, minister of natural resources and minister in charge of the insurance act.

Announcement of a 25 per cent. reduction in hull insurance has already been given out from Ottawa.

Word of the new cargo rate came by way of a cable to R. H. Cook, Regina agent of Lloyd's of London.

The new rates, effective between August 10 and October 10, will be three quarters of one per cent. as compared with one per cent. formerly. For the extra month at the beginning of the season the old one per cent. rate will apply. For the five day extension at the end of the season the rate will be 1 1/4 per cent.

Change in the open navigation season was sighted by way enthusiasts as definitely opening the way for traffic in winter time for use in harvest fields of western Canada.

Switzerland has a large railway bridge which can be stored during the winter to protect it from avalanches.

Peking, China, "the world's dustiest city," suffers from dust storms that blow in from the Gobi desert.

Iceland's capital, Reykjavik, has a thoroughly modern hospital of 100 beds.

Livestock Show

Western Livestock Men Plan To Hold Western Royal Show Annually

A "Western Royal" livestock show, along similar lines to the Highland show in Scotland and the Royal Agricultural Show in England is in process of formation by prominent livestock men in the west.

The plan is to hold a combined livestock show annually, the show being rotated in turn between the provinces of Manitoba, Saskatchewan, Alberta and British Columbia. In this way stockmen hope to create a keen interest in livestock in each of the western provinces by making a great exhibit of livestock easily accessible to the western Canadian public.

Promoters hope for the same co-operation and support for their western venture from eastern livestock interests as has been extended by western stockmen to the Toronto Royal show in past years.

Inter-provincial competitions will be featured for each of the breeds and the show is being organized in provincial units, the directorates being composed of the presidents of each of the provincial breed associations and breed clubs.

The responsibility of getting out their most attractive and representative exhibits is being placed directly on each provincial association and club. This, it is felt, should develop a friendly rivalry in inter-provincial competitions and result in a combined exhibit of the very best in livestock that western Canada has to offer the public.

Stockmen interested in the project declare the depression is over for livestock and it is again taking its proper place in western agriculture.

Historic Spot

In a quiet garden of a residence in Martinsburg, Natal, a company of distinguished people honored a fatigued mimosa tree, under the spreading branches of which General A. W. L. Pretorius, members of the Volksraad, and burghers of the Natal Republic decided on July 5, 1842, to accept British rule. The 1935 group unveiled a plaque at the base of the tree telling of its place in history.

Interplanetary Communication And Other Wonders Forecast By American Chemical Society

Maple Syrup Throughout The Year

Production High And Price Expected To Be Lower

Production of maple syrup and maple sugar this year in Eastern Canada promises to be higher than for several years past, according to the Fruit Branch, Dominion Department of Agriculture, and consequently the price is low. The season opened early in March in Southwestern Ontario and is now about to close in Eastern Quebec and the Maritime Provinces.

Notwithstanding the general high quality of maple syrup and maple sugar produced in Canada, the Department points out that the per capita consumption of maple products in the Dominion is only 2.7 pounds annually. Most of this is consumed in the spring time, for the reason that it is not generally known that maple products can be kept throughout the year. Any fear that the syrup will ferment in cans that have been opened may be obviated by removing the syrup from the cans when purchased in the spring, heating the syrup, putting it in glass sealers, and storing in a cool dry place.

Export of Canadian maple products to the United States, which, for some time, was the principal market, is now restricted, due largely to a tariff of six cents per pound on maple sugar and four cents per pound on all maple syrup. This year's supply of maple products will be sufficient to meet all domestic demand.

Queen Marie Takes Credit

Marie, Dowager Queen of Rumania, in her autobiography takes unto herself much of the credit for bringing Rumania into the Allied ranks during the Great War and keeping it there even after the little nation was exhausted. Marie describes her activities in "Ordeal: The Story of My Life."

The SNAPSHOT GUILD

SPRINGTIME IN THE ZOO

Get environment in your zoo pictures. It adds much to their interest.

"What is it we always look forward to seeing in the spring?" a teacher asked her class of eighty in, don't miss your picture from the side and have an adjoining pen of ostriches for your background, for in natural surroundings the lion and ostrich do not mix socially. Get as close to the bars of his cage as you can and shoot.

"But," you may say, "if I snap him when he is right up against the bars I would get a larger image." That's true enough and at the same time you would be getting just another picture of a lion. Suppose the image of the lion is smaller at a greater distance from your camera. How about an enlargement of the lion and enough of the entrance to his den to add environment.

Many amateurs overlook the possibilities in trimming and enlargement and in doing so they pass up the opportunity to change what would be an ordinary snapshot into an outstanding photograph.

Keep these things in mind when taking all kinds of animal pictures—wild and domestic. Get environment in the picture and you will soon be convinced by results that it is well worth the little thought and effort it requires.

Background and foreground should be given careful consideration in taking pictures of animals and fowl at a zoo. In other words, try to get environment in your pictures—natural settings. Don't just walk up to

the cage or corral and shoot. If the lion's den, for instance, is at the back end of his cage, which it usually is, don't miss your picture from the side and have an adjoining pen of ostriches for your background, for in natural surroundings the lion and ostrich do not mix socially. Get as close to the bars of his cage as you can and shoot.

"But," you may say, "if I snap him when he is right up against the bars I would get a larger image." That's true enough and at the same time you would be getting just another picture of a lion. Suppose the image of the lion is smaller at a greater distance from your camera. How about an enlargement of the lion and enough of the entrance to his den to add environment.

Many amateurs overlook the possibilities in trimming and enlargement and in doing so they pass up the opportunity to change what would be an ordinary snapshot into an outstanding photograph. Keep these things in mind when taking all kinds of animal pictures—wild and domestic. Get environment in the picture and you will soon be convinced by results that it is well worth the little thought and effort it requires.

JOHN VAN GUILD.

Complete defence for women and children to live, no more growing old but living a whole life at 25 or 30, and giving Mars some water and Venus some oxygen in her atmosphere were forecast by Thomas Midgley, vice-president of the Ethyl Gasoline Corporation.

These forecasts, made by the past 100 years were released by the American Chemical Society, celebrating the tercentenary of chemistry in America.

Dr. Midgley said the forecasts probably do not overstep the boundaries of accepted natural laws. Some of them are certain, others may be delayed, and it is not possible to predict which. But it is certain, he thought, that there will be an end of cold, flu, tuberculosis, possibly cancer and many other ills.

In the space of time in the next century, he said, you will throw off the bed clothes by snapping your fingers, warm the room instantly by pushing a button, then throw your pyjamas into the waste basket, for then cellulose goods will be so inexpensive it will be cheaper to throw them away than to launder them.

"Indigestion will be unknown," he said, "for with discovery of certain hormones in the stomach of the boar domesticator, it will no longer be necessary to stay up after eating to digest one's dinner—just a box pill and right to bed."

"Sleep will be undisturbed and bad dreams banished. There will be 'dream tablets', chemicals inducing only pleasant dreams, or other tablets stopping all dreams."

"Engineering," he said, "is already waiting for chemistry to give a fuel which will be capable of releasing more energy per pound than is required to lift that pound out of the earth's gravitational field. Given such a fuel, interplanetary travel will be possible."

"I do not want to give the impression that interplanetary transportation will become a commonplace immediately. Considerable preparation of environment will be necessary. Mars will need water, Venus a new atmosphere, all of which will mean work for future chemists and engineers."

Chemistry and physics will develop defensive weapons in war to offset any sort of destructive progress.

"The control of the age cycle," he went on, "will become a fact making it possible for an individual to extend long life, except for accident."

Agriculture will be speeded by controlling the amount of ozone in the atmosphere and other ways particularly with synthetic hormones to promote growth.

"In this way there will be a much greater and more rapid meat production," Dr. Midgley explained. "A century hence chickens will be the size of pigs, pigs the size of cattle, and cows and bulls as big as mammoths, yet the food consumed to accomplish this will be no greater than used at present."

Irish Discovered America

Dr. Stefanason Has New Theory Concerning History Of New World

Dr. Vilhjálmur Stefanason, Arctic explorer, says the Irish discovered America six or seven centuries before the voyage of Christopher Columbus in 1492.

The explorer told the Pennsylvania Historical Association the pope has documents to support his claim. "We'll probably never know the name of the man who discovered America," he added, "but we may be positive he was an Irishman."

Stefanason described a paper written by an Irish monk in 920 A.D. telling of colonization of Iceland by the Irish at that time and said Vaidi can records show the pope in 1198 made Greenland a separate bishopric which had an unknown line of bishops until 1528.

London received its first successful cargo of wool from Australia in 1826.

WOULD EXTEND DELIVERY DATE FOR MAY WHEAT

Winnipeg.—An offer to consider extension of the date beyond which he would demand delivery of all May wheat purchased in the Winnipeg grain futures market was held out to the grain trade by John I. McFarland, head of the government wheat agency. Deferment in delivery date would be effected through transfer of hedges to a more distant month.

In a letter to the grain exchange council, Mr. McFarland said the government "was willing to co-operate with bona fide owners of cash wheat hedged in the May option" to the extent of assisting in the transfer of hedges from May to July. He also expressed a willingness to pay storage of 1½ cents a bushel to carry such hedges.

It became clear, however, the government has not entirely abandoned its plan to assume ownership of considerable quantities of wheat before May 31 and for which it holds contracts. The approximate amount of wheat involved for tender against May contracts is estimated at more than 55,000,000 bushels.

The proposal modified to a certain extent a previous announcement the agency would demand delivery of all May wheat it had purchased in the Winnipeg market. Proof of ownership would entitle the second party to the contract to consideration when the wheat not required until July is distributed.

In a signed statement Mr. McFarland said: "The time has now arrived when we wish to co-operate with all bona fide owners of cash wheat hedged in the May option and located in various positions so that we may assist to the best of our ability in the switching of hedges from May into July."

"Owners who now have their wheat hedged in July will not be interested but all others will forward to us full particulars of quantity and location as specified so that we may be enabled to determine an equitable distribution."

"The spread will be made on a basis of July at 1½ cents over May and the information you send must be computed as at the close of business on April 27."

Automobile Inquiry

Tariff Board To Take Trip Through Western Ontario

Ottawa.—M. N. Campbell, vice chairman of the tariff board, disclosed that the board will start this week on a trip through western Ontario during which it will visit Windsor, Tilbury and Oshawa in connection with its nation-wide inquiry into the automobile industry.

The board has been empowered to examine officials of companies manufacturing automobiles and parts with a view to determining if justification exists for the difference in price between cars manufactured in Canada and the United States.

In its oil inquiry the board will investigate the general effect on the industry of existing tariff rates and examine the financial structure of companies processing gasoline and other oils. It expects to leave about May 15 for western Canada, arriving in Vancouver in time to hold hearings there May 20 in both investigations. It will meet probably May 27 at Calgary for further hearings in the oil case.

Execute Revolt Leaders

Two Greek Generals Die Before A Firing Squad

Athens.—Two rebellious army generals died proudly here before a firing squad as witnesses told a court martial of an assassination plot hatched on the eve of the recent abortive Greek revolt.

Gen. Papoulas and Gen. Krimialis were executed at dawn for criminal sedition in the 10-day revolution last month. Asked their last wishes, both answered: "None."

Search Impossible Just Now

Deep Snow Buries Men Killed In B.C. Slide

Bridge River, B.C.—Recovery of the bodies of several miners from the snowslide which claimed their lives at the Tasoko Mother Lode gold mine north of here, probably during British Columbia's severe January storms, will be impossible for another month, Provincial Constable R. J. Welsman reported on his return from the scene of the tragedy.

Roland and Bill Allaire of Tyax Lake, brother trappers, were members of a search party with Constables Welsman and L. W. Sadler Brown on the grueling snowshoe trek to the mine from Bridge River after the Allaires had returned to report the mining camp had been wiped out by a slide.

When the constables returned here, they left the Allaires camped at Tasoko lake, waiting an opportunity to recover the bodies. The police were 10 days on route.

Welsman reported a blanket of snow, 15 to 20 feet deep, renders search for the bodies impossible at present.

Predict Normal Crop

Prospects For Canadian Wheat Discussed In London

London.—Prospects that the Canadian wheat crop this year would not be above normal and that the United States harvest would be poor, were seen by well-informed circles here.

These and other factors were believed to have helped in raising the London price of wheat. The other factors, these circles said, were:

1. Smaller harvests in Australia and Argentina.

2. The success of Canada's price-maintenance policy.

3. Regulation of French exports.

The Canadian crop is not expected to be above average, lack of moisture preventing a good yield, it was indicated. Heavy rainfall might make a considerable difference, it was conceded, however.

For the third successive year, experts predict, the United States will be unable to export any considerable amount of wheat. Drouth and dust storms have seriously damaged the crop.

Infants Recovering

Doctor Says Quintuplets In Excellent Physical Condition

Callander, Ont.—Mr. and Mrs. Olivia Dionne were no longer worried over the condition of their quintuplet daughters. Leo Kervin, Dionne's manager, said the parents were satisfied with the examination of the ailing children by Dr. G. W. Smith of North Bay, appointed by the father. "I know they were satisfied with this last examination," said Mr. Kervin, "for I was speaking to Mr. Dionne." He said the parents had at first wanted two doctors of their own choice to inspect the babes, but were satisfied with the findings of Dr. Smith.

Dr. Smith pronounced the infants recovering from head colds and remarked on their excellent physical condition. He was in consultation at the hospital with Dr. Allan Roy Duff, physician to the quintuplets, and commended the splendid care that had been given the children.

Tests For Jubilee Broadcast

Sir George Perley Spoke To London From Ottawa

Ottawa.—The voice of Sir George Perley, acting prime minister, was carried across the Atlantic from Ottawa to broadcasting house in London as the program department of the Canadian radio commission and the British directors made tests for the trans-Atlantic broadcast which will feature His Majesty's jubilee day presentations on May 6.

"Thank you, Ottawa—Sir George was heard as clearly as if in England," London reported to the Canadian engineers.

"An interesting experience and one that presages success for a splendid jubilee day program," Sir George commented at the conclusion of the trans-Atlantic tests.

ADMIRAL BYRD

When Admiral Richard Byrd, above, arrived at Balboa Canal Zone, he touched American soil for the first time since the start of his exploration trip to the Antarctic.

Use Western Grain

Halifax.—The prairie farmer could solve his difficulties partially by balancing grain production so that more animal feed would be produced. M. A. MacPherson, former provincial treasurer and attorney-general of Saskatchewan, declared before the Canadian Club here.

The untitled market for Canadian bacon in the United Kingdom, the speaker said, held the solution. Pork could be finished in the maritimes, Quebec and Ontario, by the use of western grain.

He urged that both east and west get together to try to bring freight rates to a level where the plan would be practicable. "Our problems are your problems, and we can best solve them together," said Mr. MacPherson.

Fear Heavier Death Toll

Relief Being Rushed To Earthquake Area In Persia

Teheran, Iran.—Fears the number of dead in the series of earthquakes which began April 12 would be greater than first reports indicated, were expressed here as relief parties sped toward the stricken areas. Present figures place the dead at 483, all natives.

Medical aid and supplies are being rushed to the stricken areas, and efforts are underway to re-establish communication.

Tahoku, Formosa.—Official reports from the earthquake area said 3,185 victims of the catastrophe have been buried and more than 10,000 injured given hospital or first aid treatment. Government hospitals at Shinchiku and Taichu are filled. Scores of first aid stations set up in tents also are operating in the district.

Riot Insurance

Rates In Vancouver Are Trebled As Results Of Disturbances

Vancouver.—Vancouver representatives of 80 insurance companies insuring riot insurance announced premiums on that type of insurance have been trebled as a result of recent disturbances in the city.

"We are not trying to take advantage of the situation in Vancouver," a spokesman for the insurance companies said. "Under the Dominion insurance companies conference it is compulsory to increase riot rates in view of recent disturbances."

The new rate has a 90-day limit. Another conference of representatives will be held and the matter discussed again when the rate may be raised or lowered according to conditions at that time.

Lithuania Increases Army

Government Acts When German Troops Sent To Border

Kaunas.—Because Germany has concentrated four divisions of troops in east Prussia, bordering Lithuania on the west, the government here announced plans for an increase in its own artillery, tank and air units, together with the complete motorization of its army.

Owing to the tense border situation the government already had issued a decree holding the present military class in service for an extra three months.

EPISODES IN THE LIFE OF THE KING

This picture was taken when His Majesty the King went to Osborne College to visit the Prince of Wales when he was in training as a naval cadet in 1907. Three years later His Majesty succeeded King Edward as King-Emperor and on May 6th will celebrate the silver jubilee of his reign.

NEED CONFERENCE ON TRADE AND FOREIGN POLICIES

London.—Unofficial complaints were voiced on behalf of manufacturers and the grain trade against Canada for alleged failure to live up to the Ottawa agreements, along with a demand for an imperial conference to discuss not only trade but foreign policy and imperial defence.

The Labor opposition organ, The Daily Herald, claimed that a lively storm was developing among the British and dominion governments over the Ottawa agreements.

The report of the Liverpool Corn Trade Association said Canada had forfeited her right to imperial preference on wheat because she had failed to offer wheat at world prices.

The Daily Mail, another opposition paper, expressed belief Europe was drifting into the pre-war alliance system and said an imperial conference should be called while the empire leaders are here for the royal jubilee, to discuss all questions of imperial concern.

It added if the dominions were found opposed to British commitments at Locarno—reaffirmed with France and Italy last week—then Great Britain should denounce it.

Indications however, were that if defence matters or foreign policy do come up, they will be the subject of only informal talks with British ministers. (In Ottawa Premier G. W. Forbes of New Zealand said: "We do not have to discuss those things," and earlier Prime Minister Bennett said there was nothing to discuss in London so far as Canada is concerned.)

Naturally, trade questions will crop up in talks between various governmental heads during their visit here.

On questions of British foreign policy and imperial defence the dominions, of course, are always kept advised by the United Kingdom government. The United Franco-British-Italian front at Stresa and in the council of the league which condemned German re-armament, led The Daily Mail, with other opposition organs, to express apprehensions, however, lest the United Kingdom alienate the dominions.

Pointing out that British obligations under the Locarno treaty (with France, Germany, Belgium and Italy) were reaffirmed at Stresa, The Daily Mail said: "Unless the dominions are wiser in this matter, the liabilities attaching to the Locarno treaty would be of the utmost peril to imperial unity. No dominion could remain neutral unless it were to secede. It is therefore imperatively necessary to test dominion opinion thoroughly. If it is against the Locarno treaty then there can be only one course for the British government—the treaty will have to be denounced."

Honor Observatory Official

Medal Awarded To Dr. Flaskett Of Victoria, B.C.

Washington.—John Stanley Flaskett, co-director of the Dominion astrophysical observatory at Victoria, B.C., was awarded the Henry Draper medal of the National Academy of Sciences of the United States.

The medal was awarded to Dr. Flaskett "in recognition of his able and consistent labors in stellar radial velocities, and related studies energetically pursued for nearly 30 years."

Dr. Frank Dawson Adams of McGill University, Montreal, a foreign associate member of the academy, received the medal for Dr. Flaskett.

Increase In Prices

Calgary.—Increase in prices in all livestock classes at the 1935 Calgary exhibition and stampede has been announced by General Manager E. L. Richardson, following a meeting of livestock committees. The increases, which in some cases almost doubled the price, were made possible by enlargement of the Dominion government grant from \$2,500 to \$5,000 and by donations from the breed societies.

THE LIBERAL LEADER ON SOCIAL CREDIT.

The Liberal party is in favor of monetary reform and is prepared to adopt "whatever is good in Social Credit," W R Howson, the Liberal leader, told the Young Liberal Ass'n in Calgary on Saturday, according to a press despatch. "The Liberal party does not fight Social Credit," he declared. "If it is 100 p.c good for the people and is practicable, the Liberal party will support it. If it is 75 or 50 or 25 p.c good for the people and practicable, then the Liberal party supports that percentage."

Notes of Sports.

Spring is here! If you don't believe it, go up and watch the golfers in action! And then they wonder why we have dust storms. During the next week, all summer sports should get off to a good start.

After a busy winter of keeping "round corners and schlick ice," Eddie & Co, has announced he is getting ready for a great summer. After swimming the Hellespont (the pier to the diving board to you) on the 20th of May, he will also play a little golf, tennis, softball, basketball, and to get a little exercise, will play baseball for local W.L.

Both the tennis and golf clubs will be organized during the first week in May; and a well founded rumor has it that the N.W. baseball league confab will be held the same week. The developments of these sports will no doubt be more definite at a later date.

In the meantime, hail to the latest sport fad for Stony, Softball! With a schedule calling for games every Tues. and Thurs., there should be plenty of errors, squarrels, and whatever usually goes with a contest; no little interest will be taken in the sport. We are not sure, but we believe the new game will be welcomed by the Scotch, as these will have a clear conscience to enjoy the games better than baseball, as there will be no collection. The teams should draw record crowds for this town.—HCO.

Peck's CAPS

—are made for those men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motoring and all outing occasions, as well as street wear.

For Sale at Hardwick's

THE NEWS OF STONY PLAIN AND DISTRICT.

Judge J L Crawford presided at a sitting of the District court in the town hall on Saturday. Six farmers of the district were given naturalization papers.

Mr T Cooper has purchased a new Master-Six Chevrolet sedan from Sommerfield & Mayer.

On Tuesday Barth & Anderson unloaded another carload of V-eight Fords.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

The Masonic Dance.

The dance at Kelly's hall Monday April 22, given by the officers and members of Meridian Lodge to their friends, was a very enjoyable affair, the hall being comfortably filled with dance patrons, both old and young. Barths contributed the music, and the dancing was kept going until the wee, wee' hours.

Edmonton Beach.

Proprietor Barrie returned some time ago from a winter spent in California, and, in spite of a backward Spring, is going ahead with the preparations for the opening of his summer resort. This popular place of recreation promises more than ever before, to be well patronised the coming season.

Mrs James Rowe, who was taken to the Misericordia Hospital last week with a broken hip, is making as good progress toward recovery as could be expected.

The building which Mr Jack Nibbale had occupied as a restaurant, tea room, and social center, is likely to remain closed thruout the season.

Mr H M Clendening, of South Edmonton Beach, was out last week, arranging for the opening of his store there on May 24.

Farmers of the district are gradually getting out in the fields, cultivating the high spots.

CHAPTER XVII.—Continued

"Where'd you bury him?" asked Stone shortly.

"Over there. . . . Our fire was there. . . . His finger pointed to a dip in the land. The drifting sand had filled the hollow and at first Stone did not recognize the place. 'I was asleep' there. . . . Peyotl pointed. . . . 'Next thing I knowed Mist Sam waked me up and I seen . . . It . . . We buried him over by that clump o' mesquite.

Stone flung him aside and walked over to the pile of loose rocks. How much of this fantastic tale was true; how much the phantasm of a disordered mind?

He threw those rocks aside as a boy throws pebbles and he was breathless when he saw what he sought. . . . some tattered rags and a scrap of old leather that the coyotes had left. There was more than that but the desert wind and the sun and the scurrying winds had done their work and he uncovered only a handful of sand-scoured bones to tell whether Peyotl Gregg had lied or not. His hand hung poised over the skull that, for reasons, he hated to touch. But that skull was vital. If Peyotl told the truth that skull would be shattered.

He glanced at Peyotl, but Peyotl had got out one of his doped cigarettes and was chewing it all. He picked up that repulsive skull and examined it carefully. If Peyotl had killed this man by smashing his head with a rock then the bones would be broken. But the skull was intact. Not till he turned it over, about to cast it aside, did he see a gaping hole in the back. Then he heard the "chink-chink" of some solid object inside it. Doubtless it was a pebble that had worked its way inside the skull. He turned the gruesome object over and over in his hands. Then something dropped at his feet with soft thud and, glancing at it, he dropped the skull with a sharp oath. There, lying between his feet, sat-

TIRED and IRRITABLE

Do you feel tired and nervous? Is your household a burden? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodbury, New Brunswick, says "It was weak and rundown. A neighbor brought me this Vegetable Compound. It helped me so much that I am taking it now as the change."

Get a bottle NOW. It may be just the medicine YOU need.

Try Lydia E. Pinkham's VEGETABLE COMPOUND

tained as to the point, its sides scored with green verdigris, lay a forty-one caliber soft lead bullet!

With a quick little gasping oath, he picked it up and fitted it to the hole in the back of the skull. It fitted! There was no doubt about it! The man had died, not from having his head smashed with a rock but from a bullet shot through the back of his head at very close range.

He replaced all the bones except the skull, replaced the rocks and went back to the horses where Peyotl sat crouching against the wind.

"This man was shot with a forty-one caliber gun," he said.

Peyotl stared at him dully and Stone angered at his stupidity, kicked him.

"This man. . . . If it's Kane. . . . How'm I to know if it's Kane?" he said.

"Look at his shoes," said Peyotl with a flash of intelligence. "He allus put 'K' on the heel in iron tacks."

After long search Stone found one shoe and came back satisfied.

"Where'd you get that gun from that you shot Kane with?" he asked. At that Peyotl came to life.

"I never had a gun in my life," he said. "But when I tookken the gun from Mist Sam. You got that. . . ."

"Yes, Sheriff Garcey's got it now. Who did that gun belong to?" "I telt you I lifted it from Mist Sam. . . ."

"And he was with you up here when . . . when Kane was killed?" "Yeah. He sure was."

Stone stood and stared at him. He could hardly believe what he knew to be true. By turned to his pony, reset the saddle and whirled on Peyotl. "Get into saddle at once," he snapped. "We're goin' back at once!"

CHAPTER XVII.

Dustin's summary arrest galvanized Reo. Men gathered before every store discussing it and questioning for details. For five years Sam, Dustin and Goddard had been considered immune to arrest and now Jim Garcey had taken him as casually as he might have taken any common brawler and no man knew exactly why. He met Dustin outside the Silver Dollar and touched him on the arm as Dustin stopped. Dopey to question him about the reported death of Gerald Keene.

"I've got a warrant for your arrest, Dustin," he said. "The charge is open violation of the Narcotic Act."

"What?" Dustin spun about and his eyes snapped. "You mean that you're arrestin' me? You're crazy, Sheriff. . . ."

"Mebbe. That's got nothin' to do with the matter. The question is . . . are you comin' with me or do I have to take you?"

There was a light in Jim Garcey's eyes that spoke more plainly than any words. Dustin made up his mind at once.

"I'll come with you of course. This is absurd. Who's sworn out the warrant?"

"A man named Stone from the Hour-glass. He swears he found you with your pockets stuffed with peyotl cigarettes and Peyotl Gregg says you've kept him supplied for years."

"The . . . the lyn' hound. . . . Dustin burst into a torrent of invective. "You mean to tell me that you're arrestin' me, a well-known citizen here, on such an absurd charge? I want to see a lawyer first of all."

"First of all, you'll come with me," said Garcey, who knew that, with Dustin once locked up, he could keep him incommunicado for some time.

There was no help for it and Jim Garcey, mindful of details, did not offer Dustin the hospitality of his house as he had done with Carr. He conducted his prisoner to the only lock-up in Reo and locked him into the big steel cage behind his office with injunctions to his deputy to allow him to see no one except under special instructions.

"You're all right for the night," he said. "Water, grub'll be supplied from the Bon Ton restaurant, two books and a paper. I'll tell Mist Masters that you want to see him. He's your attorney, ain't he? By the way Dustin. . . . You might be doin' some little figurin' on your own account. The penalty for murder in this State

is hangin'. Cattle-rustlin' an' bein' accessory before the act in a shootin' case carries a stiff sentence too. . . ."

With this Partisan arrow Garcey left and Dustin, appalled, stared after him. What could the man know? The very uncertainty brought the sweat to his forehead in great beads. Surely he had covered his tracks too well to have been discovered. What Garcey had said must be just a shot in the dark? He could know nothing. Even if Peyotl Gregg had told all he knew, no jury would convict a man on the testimony of one witness and that witness a drug-addict. For the charge on which he was arrested Dustin knew he would be free in a short time.

But Sam Dustin failed to remember that the day was Saturday and that Monday was May the thirtieth, a National holiday and that all offices would be closed. That three-day period gave Stone all the time he needed but it was late when he rode up Secco's main street, tired and dirty, with Peyotl sulking at his heels and scared to death. Jameson expelled them first and fairly dragged Stone in his office.

"Well. . . . said Jameson quivering with excitement. "I got enough to convict any man before a fair-minded jury," said Stone. "Has Garcey arrested Dustin?"

"He nailed him Saturday night," said Jameson. "He'll be held a while. Dustin's a squallin' like a stuck pig over what he aims to do when he gets loose and Spike Goddard is threatenin' to accuse from the Union if Garcey don't run Dustin loose tomorrow. You'd better look out for Dustin when he gets loose."

"I got enough to convict any man before a fair-minded jury," said Stone. "Has Garcey arrested Dustin?" "He nailed him Saturday night," said Jameson. "He'll be held a while. "I got enough to convict any man before a fair-minded jury," said Stone. "Has Garcey arrested Dustin?" "He nailed him Saturday night," said Jameson. "He'll be held a while. Dustin's a squallin' like a stuck pig over what he aims to do when he gets loose and Spike Goddard is threatenin' to accuse from the Union if Garcey don't run Dustin loose tomorrow. You'd better look out for Dustin when he gets loose."

"He'll not get loose," said Stone. "Listen to me, Jameson. . . . And Stone told him all that had taken place and wound up by laying Kane's old shoes and the shattered skull on the desk. At sight of the skull the little editor shrank back.

"Take that thing out o' here," said he. "I got no use for it."

"You might have use for it editin' the paper," grinned Stone. "Wait a bit, old man, I'm convinced that Dustin killed Kane. We know the motive. Kane took Dustin into the hills to show him the gold mine that he found on Hour-glass lands. Dustin didn't want to divide with Kane so he killed him and laid the blame very cleverly on that poor fool Gregg. If he'd killed Kane with that rock that he smeared with his blood, we'd never have discovered it. But he didn't. He shot him. Here's the bullet that smashed his skull. Of course we've got to show that Peyotl told the truth when he said he got the gun from Dustin when he shot Kane. Get your car and we'll run out to the Broken Spur and see if we can get Goddard to talk. If he doesn't know how much we really know, he may drop something. Get Jim Garcey too. We'll need him."

"That machine slammed its way up the drive before the Broken Spur just before sunset and Spike Goddard received them with grim looks. He eyed the shrinking Peyotl menacingly though he was inwardly ill at ease. How much did these men know? What had they come for? But he ushered them into the little office and Stone played the first card.

"He slapped the Derringer pistol on the desk and turned to Peyotl.

"Tell Sheriff Garcey exactly where you took this pistol from," he said.

And before Spike Goddard could stop him, Peyotl jerked open the desk drawer.

"He kept it there," he said; "he opened it himself and showed it to me and told me about Mr. Kane. . . . Keene. . . . Whatever his name is."

"Here's the green box o' cartridges! I only took three of 'em. . . ."

Spike knocked him aside angrily and turned on Garcey.

"You can't come this game on me without a search warrant," he said truculently. "Get to hell out o' here every one of you!"

But the damage was done and Spike knew it. The ownership of that Derringer was established. His furious gaze swung to Stone who said curtly:

"It's lucky for you, Goddard, that your partner has not implicated you in what he's done. He killed old man Kane and put the blame on that poor fool Peyotl. He drove Peyotl to shoot Keene in the Silver Dollar too. It's a big price to pay for a ranch, even as good as the Hour-glass with a gold-mine on it. Two men killed over a ranch. . . ."

"It was over that damned red-headed girl of Carr's," said Goddard

hotly. "I told him he was playin' the damned fool. . . . I told him he'd sure as hell trip himself. . . ."

Appalled at the significance of his thoughtless words he stood agast but it was too late. Stone and Garcey and Jameson had all heard what he said and knew its dread significance. Garcey swung on him at once.

"I'll just nail you as an accessory before the fact," he said. "You'll come with me."

And before Spike Goddard knew what was happening, Garcey slipped a pair of light manacles about his wrists. The feel of the cold steel and the click of the lock struck a chill to the heart of the ranchman. He sank into a chair and burst into shrill-voiced profanity.

"Be careful what you say," warned Garcey. "It may be used against you."

"You've got nothin' on me," snarled Goddard. "I'm not mixed up in this at all."

(To Be Continued)

The first cut in 400 years has just been made in the walls of Salisbury cathedral in England to make way for a new door in the north choir aisle.

1000 PAIRS OF MONARCH DEBUTANTE SILK STOCKINGS Free!

Go to your druggist or department store and buy RIT Dye (any color, 15c-2 for 25c). Use it. Then tell us in a statement of 30 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante full-fashioned—shadow-free pure silk chiffron stockings—latest Spring shades—guaranteed \$1.00 value—will be given as prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 200 of the newest Spring shades. RIT offers this advantage: RIT is the modern tint or dye—rapid and sure—lasts superior to ordinary "surface dye" because it contains a patented ingredient that makes the color set in deeper, set faster and last longer. Sold everywhere.

HOW TO WIN

1. Write a short statement (under 30 words) on why you prefer RIT Dye and send it together with an entry RIT package (or reasonable facsimile) and your name and address to: RIT Contest, The A.B.C. of Home Textile Making, 42 California St., Toronto.

2. Send as many as you wish; contest closes midnight June 30, 1935.

3. 1,000 prizes will be awarded on the decision of the judges, which will be final. Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge, our famous booklet—"The A.B.C. of Home Textile Making."

The Parliamentary Show.

(By J. S. Cowper.)

The 5th and last session of Alberta's 7th Legislature prorogued April 24, and an election announcement may be expected at any time.

For 52 days Members sat, facing an enormous grist of resolutions and bills which kept coming down till the last day, when the House amended the Dairyman's Act to license cars carrying cream to creameries, prohibiting the carrying of cream in any but licensed cars.

The question of redistribution rent the House on the last day. D M Duggan wanted the number of members cut from 63 to 35. Mr Shields wanted 20 only members, elected at large. W R Howson met the situation with an amendment calling for "a substantial reduction" in the number of members.

The Howson amendment came near to passing, the vote standing 27 to 21.

Premier Reid led the attack against any reduction of the membership at the present time.

So the coming Provincial election will be for the same number of seats with the same constituency boundaries as at the last general election.

Social Credit Notes.

A Social Credit study group was organized on Saturday Apr. last. Officers elected: Mr J Kyle, Pres.; Mr J Becker, V Pres.; Wm Hodgins, Sec. Their first regular meeting is to be held at Lucknow Schoolhouse Saturday Ev'g, May 4th.

Another Social Credit study group was organized at Hansen's Corner Saturday Ev'g. The officers: Pres. Mr Herbert Stirling; V Pres. Mr M A McLeod; Sec-treas. Douglas McDonald. First meeting Sat. Ev'g May 4.

Keen interest in the study of Social Credit is being shown all over this Constituency and many new study groups will be formed within the next few weeks.

The Stony study group will hold its regular meeting this Thursday Ev'g. in Kelly's hall.

An effort will be made this Thursday Ev'g. to form a group at Tecumseh, by Mr H Michel.
